## **HELLER PARTNERS WITH CIRCUIT TECHNOLOGY, RESTRONICS**

**Florham Park, NJ** – Heller Industries, the global leader in thermal technology solutions, announced two hirings today to strengthen their market position in the Eastern United States. Bob Doetzer, President of Circuit Technology Inc., has been appointed sales representative for North and South Carolina. Circuit Technology is a manufacturer’s representative and IPC training group specializing in products and services covering circuit board production and semiconductor assembly.

“We are excited to welcome Bob to the Heller team. He is a highly respected industry expert with the experience and relationships that are critical to Heller’s success in the Carolinas,” commented Frank Hart, SVP of Global Sales and Marketing for Heller.

Heller has also announced the hiring of Tim Glasgow of REStronics Southeast to represent their products in Georgia, Tennessee, Alabama, and Mississippi. REStronics Southeast leverages their diverse range of products and extensive industry expertise to assist manufacturers in improving their productivity and efficiency.

“I have had the opportunity to work with Tim Glasgow for a number of years,” stated Hart. “Tim is a tremendous advocate for his customers with unparalleled expertise in SMT. I am confident that Heller is best positioned for the future with Tim and REStronics Southeast.”
